Lesotho, Africa

CONTRACT TYPE

Engineering Services,
Operation & Maintenance

SCOPE

Finalization of the installation which include the following sections:

- Reagent Plant
 - High Lift Pump Station
 - Electrical
 - Commissioning of water treatment
- Operation of Water Treatment Plant including:
- Implementing of Operation & Maintenance Structures
 - Implementing Maintenance & Spares System
 - Train Operators

PERIOD

2013 - 2016

The Metolong works is a world class water treatment facility. With a plant throughput of 100 ML per day, it is also one of the biggest water treatment facilities in Lesotho. On this World Bank funded project, the main Design and Construct Contractor, CMC di Ravenna, appointed LogiProc to assist with the completion of Metolong Water Treatment plant, located in Lesotho, Southern Africa. The scope included the finalization of the outstanding mechanical works; commissioning & start-up testing of the water facility; and the 2-year operation of the water treatment facility.

The operations contract included training of the plant operators and the procurement and implementation of a Computer Managed Maintenance and Stores Management System.
