

African Copper

Mowana – Copper Sulphide Processing Plant

PROJECT DESCRIPTION

Engineering, Design, and Construction of a Sulphides Copper Plant.

PLANT CAPACITY

850 tph Copper Ore

LOCATION

Francistown, Botswana

CONTRACT TYPE

EPCM

SCOPE

- Engineering & Design
 - Process
 - Mechanical
 - Civil & Structural
 - Electrical
 - Control & Instrumentation
- Project Management
- Procurement
- Construction Management
- QA/QC
- Logistics
- Site Management
- Commissioning

PERIOD

2008 - 2010

African Copper is situated in Botswana, approximately 120 km outside of Francistown. The plant consisted of Run of Mine (ROM) Tip, Primary and Secondary Crushing, Conveying Stockpile, Milling, Flotation, Dewatering, Filtration and Product Loading sections.

LogiProc was contracted to assist with the design of select process areas and to complete the full design, supply, and construction of the electrical, instrumentation and control portion of the project.
